EXPERIENCE

Pluralsight | Technology learning platform for engineers and IT professionals   January 2019 - Present
Full Stack Software Engineer

- Implement internal company tooling to build and edit and publish partnership landing pages with top companies(Accenture, Google, Microsoft, etc), generating 500k+ in direct revenue with large ARR potential. Using React/Redux for the front end and Nodejs+Postgres for the backend. Built features that reduced one-off development and enabled stakeholders to manage, create, and update experiences with minimal developer attention.
- Contributor of migration core legacy service with 5+ years of data to a NodeJs system, allowing monolithic services to be deprecated.
- Build and maintain features for Home, Bookmarks, Search, and Course Pages serving over 1.5 million business users with daily production deploys and monitoring releases to ensure 99.99+% uptime
- Follow Test Driven Development and Acceptance Test Driven Development practices when applicable

Jet.com/Walmart.com | E-Commerce company   August 2016 - January 2019
Retail Partner Integration Specialist

- Write MySQL queries to pull SKU reports for partners and internal workflows.
- Improve workflows by automating processes using Visual Basics for Application.
- Identify and troubleshoot third party marketplace's integration issues.

PROJECTS

[Kafka Franz | Miami Real Estate Search Website](#) August 2019

- Improve front-end experience of Headless CMS website using existing Wordpress Rest API and ReactJs.

[Danceology | Dance Studio Website](#) January 2017

- Website built on Wordpress, JavaScript, HTML and CSS
